

# Geography Knowledge Organiser: Why does it matter where my food comes

## What should I already know?

- I can identify where I live on a map of the United Kingdom
- I can talk about and ask questions about the place where I live and the natural world
- I can talk about what is the same and what is different when comparing places I know
- I can talk about the features of my environment
- I can talk about how places are different from each other

## Fun Facts!

- About half the food eaten in the UK is imported from other countries
- 970 million dozen eggs are laid every year in the UK (That's eleven billion seven hundred sixty million eggs) Imagine the size of the omelette you could make with that!
- The world's first chocolate bar was made in Bristol in the late 1720s by Joseph Fry. His company was eventually taken over by Cadbury, another British, family owned firm.

## Key vocabulary and definitions:

Human geography	- the way humans effect and change the Earth
Physical geography	- the study of the natural features of Earth's surface
Farm	- an area of land and its buildings which are used for growing crops and raising animals
Continents	- the world is divided up into large areas of land. Europe, Asia, Africa, North and South America, Australia, Antarctica -
Plantation	- an estate on which crops such as coffee, sugar, and tobacco are grown.

## What will I know by the end of the unit?

- To identify key physical features including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil
- To identify key human features including: city, town, village, farm, factory, house, office, port, harbour and shop
- To use world maps, atlases and globes to identify the United Kingdom and other countries studied during this unit
- To understand how the weather contributes to human activities in the local area
